

Introduction:

GP Series RFID readers are high performance proximity readers featuring long range and small dimensions. The readers run from any voltage from 5 to 12.5V DC and feature high read range at as low as 5 volts making it ideally suited to a wide variety of applications, particularly access control. The same basic unit can be configured to output most of the common interface formats, including Wiegand, Magstripe, Clock / Data and RS232 serial ASCII output, making it easy to upgrade existing installations.

Features:

- ☆ **Wide Voltage range**
- ☆ **Potted for environmental protection**
- ☆ **Externally programmable interface**
- Weather resistant
