

The MJ-1000 is a small, table-top automatic cheque jogger. An important part of any branch cheque capture solution.

The importance of cheque joggers in cheque processing centers has been known for many years. You can find a cheque jogger near almost every high speed cheque reader/sorter. There is a perfect reason for that. Jogging a batch of cheques for a few seconds in the cheque jogger, perfectly aligns bottom and side edges of cheques which reduces chances of cheque jamming and double-feeding.

The CJ1000 cheque jogger is designed specifically for smaller banks, branches, community banks, and credit unions, with lower volumes of cheques..

#### Features

- Jogging tray holds up to 250 checks.
- Very small size (2.8" (W), 6.4" (H), 7.4" (D)).
- One-touch, automatic, timer controlled operation.
- Automatic or manual control of jogging time.
